USB DISPLAY MODE

This device has high speed 2.0 USB port and can function as a standard mobile disk. It supports Windows 98 (driver needed) Windows 2000/XP/Vista. When connected to PC thru USB port, this device will be shown as an external drive, double click to open it, then you are able to read and write now.

RECHARGING

Using the provided USB/DC cable to charge this device, you can plug the USB side to a standard computer USB port or you can use a standard USB AC adaptor.

If you are recharging when this device is powered on, the battery icon on the up right corner of the screen will show the status of the recharging. If recharge at device power off mode, the LED indicator on left arm will light up in red, when it's fully recharged, the red LED light will go off.

This device can continue working while being recharged. However, if it was being charged thru a computer USB port, it will not function and will show as USB mode. Then if you need to use it while recharging, please charge it using a AC adaptor.

One full recharge will take about 3 hours in power off mode.

Note: This device can be recharged either thru the DC In port or the USB port, but charging thru both ports at the same time is strictly prohibited

FIRMWARE UPGRADE

1. Please log in to our website to download the Firmware upgrade program or inquiry from us.
2. Please copy the downloaded program to the nand flash of the device, exit safely from PC connection, and then restart the device.
3. Under main menu, select "SETTINGS" and press to enter into the submenu, choose "System Setting" and then "Upgrade", the device will start searching the program and upgrade, if no result, a popup menu will say "no firmware", press "OK" to exit.
4. When the device is being upgraded, all keys will be functionless and screen will show upgrade progress.
5. When the menu prompts "RESTART", restart the device and then wait for the upgrade to complete before usage.

NOTE: Make sure no power failure during upgrade or it will destroy the device.
